WORK HISTORY

FLUTTER DEVELOPER | 01/2025 to 05/2024

Rick and Morty (Clean Architecture) App:

- Built a mobile application using Flutter and Clean Architecture principles.
- Implemented user authentication, remote data handling, and a responsive UI.

Bloc Network App:

- Developed a task management app with local data persistence and notification support.
- Utilized BLoC, Provider, and Material 3 for efficient state management and modern UI design.

Weather Forecast App:

- An app displaying current weather and multi-day forecasts using the OpenWeather API.
- Includes geolocation support, REST API integration, and animated UI.
- Optimized database queries for improved performance, reducing response times significantly in key areas of the application.

MENTOR'S ASSISTANT | 10/2023 to 05/2024

IT Center - Kungrad

- Assisted in mentoring students in Frontend development and JavaScript
- Reviewed and provided feedback on student projects; supported deployment
- Guided students in developing organizational, time management, and independent learning skills

EDUCATION

Turin Polytechnic University in Tashkent - Tashkent | Bachelor of Science

Software Engineering, Expected in 07/2028

SKILLS

Language: Dart, Flutter, HTML, CSS, JavaScript

Mobile Development: Firebase (Basic), Hive, REST API integration, Push Notifications, Geolocation

State Management : Provider, Riverpod, BLoC (basic understanding), Clean Architecture

UI/UX : Provider, Riverpod, Clean Arhitecture

Platforms: Git, Github, AWS, DevTools
